**Luxembourg, 24 April 2025 - Banque Internationale à Luxembourg (BIL) today announced its 2024 financial results. Despite persistent macroeconomic uncertainty, high interest rates and a slow recovery in key sectors, Luxembourg's oldest bank delivered a net income of EUR 170 million, demonstrating both stability and resilience.**

### **Unpredictable macroeconomic trends in 2024**

In 2024, economic conditions remained volatile. Geopolitical tensions, fluctuating energy prices contributed to an unpredictable global environment. The European Central Bank (ECB) initiated a gradual decrease of its interest rate in June 2024, after a sudden hike from 0% in July 2022 to an all-time high of 4% in September 2023. Although easing had started, the effect of high rates continued to impact major sectors across Europe and Luxembourg throughout 2024, notably real estate and construction.

At the same time, AI (Artificial Intelligence) gained momentum as a transformative force, adopted by governments and companies to boost productivity and navigate fast-changing technological landscapes. BIL embraces this new technology to adapt and transform its services. Berry, the Bank's virtual assistant is available to clients on its online banking platform BILnet since May 2024. Powered by AI, Berry can help clients with questions related to credit card status and credit card payments. Its abilities will be progressively enhanced, contributing to the development of BIL's digital services offering.

### **A resilient performance, 2024 net income of EUR 170 million**

BIL's performance in 2024 reflected its resilience in a challenging environment. The global instability and the prevailing interest environment impacted households and businesses. Clients showed increased caution, especially when it came to new investments and borrowing decisions.

Total loan volumes declined slightly to EUR 16.2 billion (from EUR 16.4 billion in 2023), while customer deposits increased to EUR 18.8 billion supported by attractive interest rates and growing demand for more remunerative saving products. Assets under management rose from EUR 43.8 billion in 2023 to EUR 46.8 billion, driven by both new inflows and positive market performance, a clear sign of client trust.
